EXPRESSIVE MUSICIANSHIP

Concepts and Exercises to Develop a Band's Musical Potential

Conductors who communicate the affective qualities of the music are always more successful than those who communicate only technical details, such as when and how to play.

It is the feeling behind the "how" that makes all the difference in the world to the musicians and ultimately to the audience.

(Harris, 2001, p. 11; Conducting with Feeling)

Only one thing is for sure.

No interpreter ever agrees with anyone else's interpretation.

(Albert Schweitzer)

EXPRESSIVE MUSICIANSHIP

Concepts and Exercises to Develop a Band's Musical Potential

“Musical expression is often not explicitly addressed in secondary instrumental rehearsals due to the perception of expression as an obscure concept and the instructional time constraints on music educators.” (McLerran, 2024, p. 20)

McLerran argues that ***“secondary music educators should explicitly encourage the development of expressive techniques from the beginning of formal study.”*** (McLerran, 2024, p. 20)

“There is no universally correct way to be expressive”
(McLerran, 2024, p. 21)

McLerran, M. (2024). Developing musical expression in instrumental ensembles. *Music Educators Journal*, 110(4), 20-27.

TEACHING INSTRUMENTAL MUSIC

Developing the Complete Band Program

SECOND EDITION

Shelley Jagow

Jazz Ensemble

POINTS TO
CONSIDER

POINTS TO
CONSIDER

EXPRESSIVE MUSICIANSHIP

Concepts and Exercises to Develop a Band's Musical Potential

The most common pedagogical strategies for teaching expressivity to instrumental students include:

- a) explicit instruction,*
- b) aural modeling, and*
- c) metaphor.*

(McLerran, 2024, p. 24)

EXPRESSIVE MUSICIANSHIP

Concepts and Exercises to Develop a Band's Musical Potential

RHYTHM: Concept #R-1

*The first note of a syncopated rhythm is detached
and the second note is stressed*

Set *O* indicates *Original* notation.
Set *S* indicates how notation should be *Stylistically* performed.

R1.1 Exercise in 2/4; Bb Major (mm. 1-8) [Jagow]

The musical notation for Exercise R1.1 is presented in two versions: 'Original' (Set O) and 'Stylistic' (Set S). The exercise is in 2/4 time, Bb Major, and consists of 8 measures. The 'Original' version shows a syncopated rhythm where the first note is detached and the second is stressed. The 'Stylistic' version shows the same rhythm with a different notation style, likely to illustrate a specific performance technique.

- Scale-based Exercises

EXPRESSIVE MUSICIANSHIP

Concepts and Exercises to Develop a Band's Musical Potential

RHYTHM: Concept #R-7

Similar rhythms juxtaposed should remain distinctly different.

Set *O* indicates *Original* notation. Set *S* indicates how notation should be *Stylistically* performed.

R7.3 Children's Song: Muffin Man (mm. 1-8) [Traditional]

The musical notation for 'Muffin Man' is presented in two staves. The top staff, labeled 'O' for Original notation, shows the melody in treble clef with a key signature of one flat (Bb) and a 2/4 time signature. The bottom staff, labeled 'S' for Stylized notation, shows the same melody with various rhythmic markings (accents, slurs, and ties) to indicate how it should be performed stylistically. To the left of the staves, the instruments are listed: Flute, Oboe, Keyboard, and Mallet. A lightbulb icon with the word 'TIP' inside is positioned below the stylized notation.

TIP To prevent early entrances after a rest, practice counting aloud/clapping/playing/sizzling the **subdivisions** and then **internalize**.

look ahead; first indication of stylistic edit

What is expressive music?

Albert Schweitzer:

Only one thing is for sure. No interpreter ever agrees with anyone else's interpretation.

Pablo Casals:

One can never exhaust the multiplicity of nuances and subtleties which make the charm of music.

Musical Concepts

Rhythm

RHYTHM: Concept #R-1

*The first note of a syncopated rhythm is detached
and the second note is stressed*

Set *O* indicates *Original* notation.
Set *S* indicates how notation should be *Stylistically* performed.

R1.1 Exercise in 2/4; Bb Major (mm. 1-8) [Jagow]

O

S

Original

Stylistic

RHYTHM: Concept #R1 (R1.1 - R1.6)

The first note of a syncopated rhythm is detached and the second note is stressed.

The 1st line *O* indicates *Original* notation, while the 2nd line *S* indicates how notation should be *Stylistically* performed.

R1.1 Exercise in 2/4; Bb Major (mm. 1-8) [Jagow]

Original notation (O) and stylized notation (S) for R1.1 Exercise in 2/4; Bb Major (mm. 1-8) [Jagow]. The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

R1.2 Exercise in cut time; Bb Major (mm. 1-8) [Jagow]

Original notation (O) and stylized notation (S) for R1.2 Exercise in cut time; Bb Major (mm. 1-8) [Jagow]. The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

R1.3 Children's Song: Purple Stew (mm. 1-9) [traditional]

Original notation (O) and stylized notation (S) for R1.3 Children's Song: Purple Stew (mm. 1-9) [traditional]. The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

R1.4 Linstead Market: (mm. 1-8) (Traditional)

Original notation (O) and stylized notation (S) for R1.4 Linstead Market: (mm. 1-8) (Traditional). The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

R1.5 Linstead Market: (mm. 2-9) [public domain]

Original notation (O) and stylized notation (S) for R1.5 Linstead Market: (mm. 2-9) [public domain]. The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

R1.6 BERNSTEIN/GRUNDMAN: Candide Suite "Glitter and Be Gay" (mm. 46-53) [© 1949/52 Hal Leonard. Used by Permission]

Original notation (O) and stylized notation (S) for R1.6 BERNSTEIN/GRUNDMAN: Candide Suite "Glitter and Be Gay" (mm. 46-53) [© 1949/52 Hal Leonard. Used by Permission]. The stylized notation (S) shows the first note of a syncopated rhythm detached and the second note stressed.

RHYTHM: Concept #R-1

The first note of a syncopated rhythm is detached and the second note is stressed.

Set *O* indicates *Original* notation. Set *S* indicates how notation should be *Stylistically* performed.

S

TIP

NOTE: In every exercise there will always be additional styles that could be edited, but for the purpose of this method, we will only address each specific concept.

RHYTHM: Concept #R-3

In fast tempo, a rhythmic dot or tied note should not be played.

RHYTHM: Concept #R-4

Rests receive full value.

RHYTHM: Concept #R-5

Notes followed by a rest should be held full value unless otherwise marked.

RHYTHM: Concept #R-6

Bring out notes with small rhythmic values.

RHYTHM: Concept #R-7

Similar rhythms juxtaposed should remain distinctly different.

2

Melody Phrasing

MELODY/PHRASING: Concept #M-1

The first note of a "sighing" motif is stressed (pushed) and the second note is made weaker.

Set *O* indicates *Original* notation. Set *S* indicates how notation should be *Stylistically* performed.

M1.5 DE HAAN: Ammerland (mm. 16-19) [© 2001 Hal Leonard Europe. Used by Permission]

Original

Stylistic

O

Flute
Oboe
Keyboard
Mallet

S

Thinking of a small/subtle decrescendo shape on the tenuto assists with correct style.

MELODY/PHRASING: Concept #M-2

Anacrusis (pickup notes) in a slow to moderate cantilena tempo are played with tenuto length.

MELODY/PHRASING: Concept #M-3

Hesitating slightly between the anacrusis and the downbeat enhances the energy and expressive quality of a pickup in bravura style at a moderate to fast tempo.

MELODY/PHRASING: Concept #M-4

The longer notes of a phrase or rhythmic pattern should be played with more emphasis than shorter notes. (The difference need not be great; this will depend upon the particular phrase and personal interpretation.)

MELODY/PHRASING: Concept #M-5

Low searches for high, and high searches for low. Music never stands still. Musical interest is either moving toward a climax (poco cresc.) or away from one (poco dim.).

MELODY/PHRASING: Concept #M-6

Repeated motifs are treated as repeated notes and intensified with a slight crescendo.

MELODY/PHRASING: Concept #M-7

*Each phrase has a climax point. Most climaxes (*) occur near the middle of the phrase, but not always. It is common that the melodic line builds (<) to the climax point and then recedes (>).*

MELODY/PHRASING: Concept #M-8

Breathing must fit the phrasing. Determine where the phrases begin and end, and take breaths where they will not interrupt the feeling and flow of the phrases.

MELODY/PHRASING: Concept #M-9

Melodic or thematic parts should be brought out over parts that accompany or are merely rhythmic or harmonic.

MELODY/PHRASING: Concept #10

Short looks for long. With the Arsis-Thesis grouping of notes, utilize the natural breaks or divisions within each beat, measure, and melodic line.

MELODY/PHRASING: Concept #M-11

Practice singing musical passages with natural syllables of expression, adding subtle nuance and inflection of personal feeling to the syllables. Then perform the same passage on your instrument.

MELODY/PHRASING: Concept #M-12

Notes that are altered by accidentals and fall on the beat should be slightly accented.

Dynamics Balance

DYNAMICS/BALANCE: Concept #D

Ensemble dynamics are relative to instrumentation and balance.

*For ensemble crescendos, lower voices should crescendo faster/more than the higher voices.
For ensemble decrescendos, lower voices should decrescendo slower/less than the higher voices.*

Consider teaching dynamic vocabulary on a scale of 1 – 10 with 1 being the softest and 10 the loudest (but never louder than what is beautiful!). Or fine balance dynamics by adding plus (+) or minus (-) symbols.

Embellishments

EMBELLISHMENTS: Concept #E-1

*Trills of a beat or longer in melodic passages should begin slowly before transitioning to a faster trill.
Keeping the faster part of the trill even is often more important than the speed itself.*

EMBELLISHMENTS: Concept #E-2

*A short grace note should be softer than the note that follows,
and 'borrows' some time from the previous note.*

EMBELLISHMENTS: Concept #E-3

*An appoggiatura should be stressed somewhat, with the following note softer.
(The appoggiatura is a dissonant note, and must follow the rule of dissonances in being slightly stressed.)*

Articulations

ARTICULATIONS-ACCENTS: Concept #A-1

An accented note not slurred should be slightly detached from the preceding note.

Set *O* indicates *Original* notation. Set *S* indicates how notation should be *Stylistically* performed.

A1.2 Children's Song: A Tisket A Tasket (mm. 1-8) [Traditional]

Original

Flute
Oboe
Keyboard
Mallet

Stylistic

TIP Leave a small space of silence before each accent.

The image displays a musical score for the children's song 'A Tisket A Tasket' in 4/4 time, spanning measures 1 through 8. The score is presented in two staves: the top staff is labeled 'O' for 'Original' notation, and the bottom staff is labeled 'S' for 'Stylistic' notation. The key signature is one flat (B-flat), and the time signature is 4/4. The original notation (O) shows a melody with accents (>) on the first, third, fifth, and seventh notes of each measure. The stylistic notation (S) shows the same melody but with a small space of silence before each accented note, indicated by a light blue shaded area. A tip box at the bottom left of the score states: 'TIP Leave a small space of silence before each accent.' The background of the slide features a dark blue, textured pattern with musical notes and a large pink headphones icon at the bottom center.

ARTICULATIONS-ACCENTS: Concept #A-1

An accented note not slurred should be slightly detached from the preceding note.

ARTICULATIONS-ACCENTS: Concept #A-2

*When two or more accented notes are in succession, they should be separated from each other.
Each one must be shortened slightly, leaving a little 'daylight' between.*

ARTICULATIONS-ACCENTS: Concept #A-3

The last note of a slur takes on the character of the following note.

6

Style

STYLE: Concept #S-1

In the bravura (heroic) style, the 8th note is played somewhat detached while 16th notes remain longer.

Set $\mathcal{O}$ indicates *Original* notation. Set $\mathcal{S}$ indicates how notation should be *Stylistically* performed.

S1.4 Staccato Articulation (mm. 1-4) (Arban/ed. Jagow: *Intermediate Studies for Developing Artists* series) [© 2014 Meredith Music.]

Stately

O

Flute
Oboe
Keyboard
Mallet

S

1.

2.

TIP

This stylistic practice gives a sense of clarity and rhythmic drive to the phrase.

STYLE: Concept #S-2

In expressive playing, the first note of the slur is held slightly longer than subsequent notes.

STYLE: Concept #S-3

In cantabile style, final notes of phrases should be rounded off (). By tapering the last note, or making a little diminuendo before the release, the phrase will sound more finished. Avoid 'square corners' ().

STYLE: Concept #S-4

Long notes, except at the end of a phrase, or when otherwise marked, should be sustained at an even dynamic level (). They should not be allowed to diminish (), or become 'wedge-shaped'.

STYLE: Concept #S-5

Repeated notes on the same degree of the staff are intensified with a crescendo.

STYLE: Concept #S-6

In longer repeated patterns, the second statement usually echoes the first.

STYLE: Concept #S-7

When tempo or style calls for the playing of detached notes, definite points of release (), [as opposed to decays () or diminuendos] to the longer note values are needed to maintain the intensity in the line.

STYLE: Concept #S-8

The treatment of 16th notes should be "rhythmic" and played in precise tempo of subdivision.

Tempo

TEMPO: Concept #T-1

The faster the notes, the longer (proportionally) they should become.
(Exception: With a large ensemble in a "live" room, it is best to play faster notes as staccato.)

Set *O* indicates *Original* notation. Set *S* indicates how notation should be *Stylistically* performed.

T1.6 VAUGHAN-WILLIAMS: English Folk Song Suite, No. 3 March (ms. 32-40) [public domain]

Original

Stylistic

O

Flute
Oboe
Keyboard
Mallet

S

If winds try to play faster notes too short, this often leads to tension and rhythmic inprecision.

TEMPO: Concept #T-1

The faster the notes, the longer (proportionally) they should become.
(Exception: With a large ensemble in a "live" room, it is best to play faster notes as staccato.)

TEMPO: Concept #T-2

In a slow melodic piece, groups of faster notes should be played with a little rubato.
Usually it will sound best if you start the fast group rather deliberately and then play the latter part of it a little more quickly.

TEMPO: Concept #T-3

Do not be in a rush to get to the downbeat, nor hurry to meet important notes.
Important notes (final notes of phrases, accented notes, accidentals, etc.) must be carefully 'placed' (—) or even slightly delayed (∩) in order to draw more attention to their importance.

8

Releases

RELEASES: Concept #RL-1

Release in SATB sequence:

S = Soprano

Release *slightly early* to ictus

A = Alto

T = Tenor

Release *on* ictus

B = Bass

Release *slightly after* ictus

O indicates *Original* release. *S* indicates *Stylistic* release.
