Teaching Through Performance or Performance Through Teaching?

A Pedagogical Approach to Teaching Instrumental Music

The Midwest Clinic
Chicago, Illinois
Thursday, December 19, 2002
8:30 AM

Dr. Laurie Lafferty, Clinician
The University of Akron

Assisted by members of the
Buchholz High School Wind Symphony
Paula Thornton, Director
WHAT IS DRIVING OUR MUSIC EDUCATION CURRICULUM?

- Numbers
- Sports (“Jock”) Mentality
- Non-curricular objectives as primary course objectives
- Literature

WHAT SHOULD BE DRIVING OUR MUSIC EDUCATION CURRICULUM?

Curriculum needs to be driven by a sound educational philosophy and good pedagogical practice

GOOD PEDAGOGICAL PRACTICE MEANS:

- Teaching and reinforcing correct embouchure, posture, hand position, breathing, and articulation which results in the development of good tone, technique, range, flexibility, and musicality.

- Teaching students to read, interpret and perform musical notation, i.e., teaching students to play with a steady pulse; read and play correct notes; memorize fingerings; count and play correct rhythms; and, recognize and respond appropriately to musical terms and symbols.

- Teaching students to make music (play literature) by applying the above skills to make music.

  The literature is dictated by the curriculum not the curriculum by the literature.

A thorough, systematic warm-up can be used as the focal point for the development of fundamental playing skills
Instrumental Music Education
What Should Our Students Learn?

Improved Intellectual Capacity

Improved Social Skills

To Play Their Instruments

Discipline

To Read, Interpret & Perform Musical Notation

To Make Music (Literature)

Responsibility

Sense Of Accomplishment

Ability To Work As A Team

Knowledge Of Music History

Life Long Friendships

Music Appreciation

How To Travel
Three Essential Components of a Rehearsal

PART 1 Warm-up (think in terms of building)

Purpose

- Warm up muscles slowly and gently
- Bring focus to the rehearsal
- Establish a routine
- Reinforce fundamental playing position
- Provide the opportunity to develop and refine endurance, improve technique, and develop musical and listening skills through repetition
- Review previously learned material
- Tune

A Warm up should contain the following:

- Long Tones
- Lip Slurs/Arpeggios
- Scales:
- Listening exercises, number patterns, singing and tuning:
- Chorales

PART 2 Review Of Previously Learned Material And/Or Introduction Of New Concepts

PART 3 Literature

- Use above exercises to teach skills, use band music to apply the skills learned and work in depth on musical/aesthetic aspects of performance.
- In other words:
  Don’t let the band music dictate the curriculum.
  Choose music that is technically accessible to the students so they can concentrate on a musical performance
Scales & arpeggios are the basis of at least 90% of all finger technique required in school bands and orchestras and form the foundations of all exercises intended to improve finger dexterity.

Colwell & Goolsby, The Teaching of Instrumental Music, 2\textsuperscript{ND} ed.

Beginning players must devote their concentration and most of their practice time developing the embouchure. Tone quality, pitch, range, endurance, and articulation depend upon the embouchure.

Colwell & Goolsby, The Teaching of Instrumental Music, 2\textsuperscript{nd} ed.

Warm-up is not just a warm-up; it is a place to learn. We maintain, develop or extend an individual’s and the group’s ability and skill.

Robert Foster

The warm-up is a period for daily embouchure training, during which habits can be established. The routine of long tones, lip slurs, technical exercises, and lyrical playing will accelerate development.

Colwell & Goolsby, The Teaching of Instrumental Music, 2\textsuperscript{ND} ed.

Kids don’t like what they can’t play.
Carl A. Bly, Lake Braddock H. S., VA.

Repetition is Mastery
Marquerite Wilder

Musicality starts with the establishment of good tone and good technique. Good tone and good technique are obtained through the development of good embouchure, posture, and playing position.

Laurie Lafferty

People teach the way they were taught, not the way they were taught to teach.
