

Developing Student Portfolios in your Band Program

Student self-assessment and portfolios are useful to enhance band students' critical listening skills, analytical skills, and student self-monitoring of proficiency and aesthetic development. The strategies presented have been applied in several school band programs across the Midwest and are a result of a nine-year longitudinal study applied throughout an entire instrumental music program. Student self and group assessments are an effective means through which instrumental music teachers can assess students in an authentic context and students can monitor progress in portfolios. More information can be found in the following article:

Burrack, F. (2002). Enhanced assessment in instrumental programs. *Music Educator's Journal*, 88, (6), 27-32.

Through self-assessments and progress portfolios, students develop a deeper musical understanding than is often achieved without such a process. As a motivating tool, the act of self-assessment provides an incentive to enhance critical listening skills provided by the focus of the assessments. Categories in the assessments provide direction in student listening contributing to informed musical decisions by helping students focus on the concepts around which the music had been created and will be performed.

An effective learning environment is established through the assessments offering enhancing student awareness of, and sensitivity to compositional elements with the music that is initially inaccessible. Many students are not aware of many technical and expressive aspects in their playing until they listen to and assess themselves. This enhanced awareness presents the students with the opportunity to construct meaning of particular occurrences and, through further rehearsal, apply isolated observations to the musical whole. Self-assessments enhance student ownership of the music learning.

Progress portfolios provide the documentation through which students can experience, monitor, and discover progress in musical understanding, critical listening and analytical skills, and aesthetic sensitivity. Enhancement of these critical attributes is often not immediately obvious unless the student is exposed to progress over time which is a strength of progress portfolios.

Frederick Burrack is a member of the Kansas State music education faculty as an instrumental music education specialist. Prior to KSU, Dr. Burrack taught instrumental

music education at Ball State University from 2002-2005 and instrumental music in the Carroll Community School District in Carroll, Iowa from 1982-2002. At Carroll High School he initiated student self-assessment and portfolio development into the performance program. His research has been published in the *Music Educators Journal*, *Teaching Music Journal*, *Journal of Music Teacher Education*, *Update*, and the *Journal of Technology in Music Learning*. 785-537-5764 <http://www-personal.ksu.edu/~fburrack/>

Music Portfolios

DEFINITION: A portfolio is a collection of student work that exhibits efforts, progress, and achievement. The portfolio is an attempt to capture a wider, richer context to achievement that holds long-range meaning to the learner.

WHAT DO PORTFOLIOS ACCOMPLISH?:

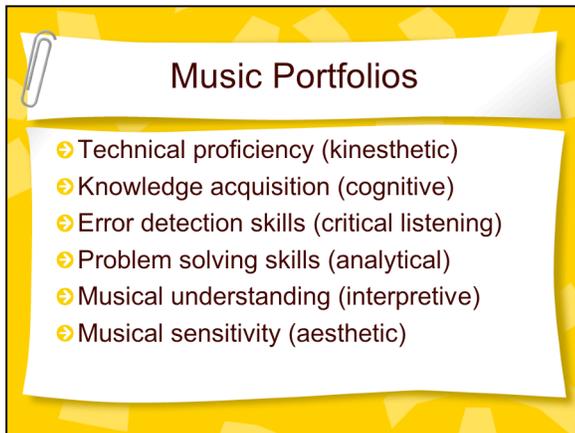

1. Portfolios encourage students to deepen musical understanding.
2. Portfolios provide incentive to enhance critical listening skills necessary for advanced musicianship.
3. Portfolios demonstrate that the student has engaged in self-reflection.
4. Portfolios contributes to student ability to make informed musical decisions.
5. If graded, portfolios must include criteria used for assessment and makes student accountable for musical learning goals.
6. Portfolios can encourage students to develop abilities needed to become independent, self-directed learners so they can take ownership of their musicianship.
7. Portfolios can provide a lasting record of students' progress and accomplishments toward becoming a creative, expressive musician.

CONTENTS: Portfolio contents reflect some balance between the goals of a band program and the interests of the individual learner.

Self-assessments
Group-assessments
Tests
Journals
Teacher evaluations

Individual goals
Recordings
Repertoire lists
Peer critiques
Student compositions

Honors/awards

Newspaper clippings
Concert programs
Records of lessons

INSTRUMENTAL PERFORMANCE GRADING RUBRIC

Rating	NOTE ACCURACY	PITCH	RHYTHMIC ACCURACY	STONE QUALITY	ARTICULATION (Style-Delivery)	EXPRESSION (Musicality)	OTHER (fingering, sticking, memorization, etc.)
10	Notes accurately performed throughout.	Pitch is centered; Pitch and intervals are accurate throughout.	Tempo, meter and rhythm accurate and secure	Focused production, placement, resonance and volume, free of visible tension, solid support. Registers even throughout.	Attack, release, delivery are properly executed as indicated in music or appropriate for style, standards and cultural traditions.	All aspects of musical expression (phrasing, breathing dynamics; intensity, pedaling etc.) properly executed; Reflects understanding of musical structure; Communicates emotional content	
8	Inaccuracies minimally interfere with overall performance	Basically good tonal center; occasional wrong or "out of tune" notes.	Nearly accurate, a minimal amount of imprecise rhythms. Consistent tempo and meter.	Focused tone production, some unevenness in registers/resonance, occasional lack of energy and volume.	Articulation is mostly appropriate for music performed.	Most aspects of musical expression are properly managed, though at times inconsistent.	
6	Minor errors that interfere with the overall musical communication	Poor tonal center; "many out of tune" or wrong notes interfere with musicality.	Inconsistent rhythms though consistent tempo and recognizable meter	Inconsistent production, energy, resonance & volume. Some tension in physical appearance.	Musical performance lacks articulation needed to properly communicate music at hand.	Musical expression is less adequate and inconsistent; a lack of sensitivity in musical expression	
0	Numerous errors that result in ineffective musical performance.	Unsatisfactory: Lack of tonal center results in ineffective musical performance.	Tempo/meter inconsistent; imprecise rhythms.	Performance lacks focus, volume, resonance and energy.	Performance inappropriate for musical style, standards and/or cultural traditions.	Overall lack of musical expression

Students Assessing the Large Ensemble

4 Tone Quality: Consider: On Nymnoug it seemed that we were resonance, control, clarity, very strong at the beginning & then towards the end we seemed to get weaker. More control in the brass. Too much blasting of notes.

4 Intonation: Consider: with our accuracy was very high compared to what we were at the beginning of the year. Trumpets need to pay more attention to accidentals.

4 Rhythm: Consider: accuracy of note and rest values, duration, pulse, steadiness, correctness of meters. On Jazy (Laria) we could have paid more attention to what the rhythm really was.

3 Balance, Blend: Consider: likeness of qualities, awareness of ensemble, accompaniment. On this category we need a lot of work. We need to have more lows and less highs. Balance needs very much improvement.

3 Technique (facility/accuracy): Consider: articulation, attacks, releases, control of ranges, musical and/or mechanical skill. We need to work on attacks & releases a lot more. On German Xmas we need to work on when & when it's all off. We need our notes, but sometimes wrong ones slipped.

3 Interpretation: Consider: style, phrasing, tempo, dynamics, emotional involvement. At the beginning of the year, I would have had this category at a one. We have really improved on this. But, we still need to play with more feeling instead of just playing the notes on the paper. The songs we played changed dramatically in what it asked us to play. Jazy Bells was very good. Our feelings really came out.

Performance Critique

In my band I would record the concert rehearsal two weeks before the performance, have the students write their observations and set improvement goals for the ensemble. Time would be provided for students to share their observations in each category. I would compile the student observations and the final two weeks of rehearsal would be focused on the student goals. This provides student ownership of the rehearsal and a unique engagement during this critical rehearsal time.

Rehearsal Comparison

Name _____
 Hour _____ Piece _____
 Instrument/Voice part _____ Date _____

Write the appropriate measure numbers and concept(s) in the blanks provided. Listen closely for your concept(s) in the two recordings. In the appropriate boxes write down your observations and comparisons using specific musical terminology

CONCEPTS	
rhythm	blend
tone	intonation
phrasing	style
balance	articulation

MEASURES _____	CONCEPT(S) _____	
OBSERVATIONS		COMPARISONS
#1		
#2

Goals for sectional:

Overall accomplishments of this sectional:

Problems to be worked on in future sectionals:

How to maintain a portfolio?

- ✓ Students should maintain a portfolio - not the teacher
- ✓ Select a filing cabinet
- ✓ Place an enveloping folder for each student
- ✓ Students add required components
- ✓ Add concert programs
- ✓ Add newspaper articles, pictures, misc.

The Final Product

- ✓ Keep each year organized with title page per year
- ✓ Create a cover
- ✓ Add envelop for recordings
- ✓ Have all contents bound
- ✓ Give as gift upon graduation

GRADING: The portfolio can be used in the grading plan. An idea could be applied as follows:

25%-Lesson Grade (includes scores from individual lesson achievement rubrics and student goal setting form)

10%-Ensemble Participation (includes comparison forms, journals, student self-reflection of participation/accomplishments, teacher observation of participation, attendance record)

15%-Technical Proficiency (recorded excerpts assess with proficiency rubric)

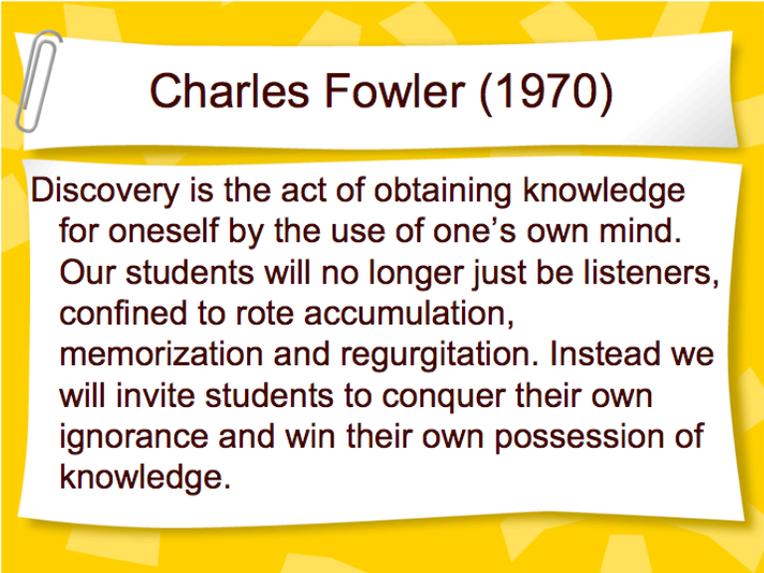

10%-Self-assessment (Student self-assessment of recorded excerpts scored with rubric)

10%-Performance Critique (*Scored with rubric*)

10%- Service – (attendance record of required events)

20% - Projects – (2 projects selected from: solo performed at festival/concert, jazzband participation, per community performance, chamber ensemble participation, student conducting, research paper, written program notes, letter to composer, peer teaching, etc.)

General Notes

Charles Fowler (1970)

Discovery is the act of obtaining knowledge for oneself by the use of one's own mind. Our students will no longer just be listeners, confined to rote accumulation, memorization and regurgitation. Instead we will invite students to conquer their own ignorance and win their own possession of knowledge.
